### DETAILED ACTION

1. The Response to Election received November 14, 2005 has been entered and carefully considered. Claims 28-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 14, 2005.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. In claims 1 and 17, the body of the claims does not support the limitation of the preambles- "without the introduction of any errors".

Firstly, in a data communication, errors simply exist; therefore, the limitations of the preamble seem to be an impossible task in a real world, in the context of the claim.

Secondly, there are no significant limitations recited in the body of the claims to support the limitations of the preamble.

Thirdly, the metes and bounds of the claimed "error" is unclear from the context of the claim, i.e., what kind of error?

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 & 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chu (4,082,922).

In figure 2 and the respective section teaches all of the limitations of the claims 1 & 17; therefore, the claimed invention is clearly anticipated by the teachings of the Chu reference.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-16 and 18-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu (4,082,922).

b. The examiner notes that the limitations regarding dependent claims are typically well known options/features of reduced error communication art. The examiner further recommends the applicant to extensively look at the US

Art Unit: 2182

PATENT FILE Class 714/Subclasses 748 & 749 plus for such typically well-known options/features for the motivation of reduced error & efficient communication. The above patent file only has about 750 patents, and many will have the limitations of the dependent claims. The examiner takes official notice on such typically well-known and well-desired features of the above limitations of claims 2-16 and 18-27. Therefore, it would have been obvious at the time the invention was made to one having ordinary skill in the art to further add the commonly/typically well known features in the Chu's system for the reasons stated above.

c. The examiner suggest the applicant the applicant to carefully search the class 714 at least familiarize what is commonly known & practiced in the art.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher B. Shin whose telephone number is 571-272-4159. The examiner can normally be reached on 6:30-5:00 M,Tu,Th,F.
